ADVANCING COMPOSTING, ORGANICS RECYCLING & RENEWABLE ENERGY

## BioCycle World

BioCycle April 2009, Vol. 50, No. 4, p. 6

### Food Waste Newsletter And Blog

LeanPath, Inc. recently launched a blog and an electronic newsletter devoted to news about food waste reduction. The company provides food waste tracking software and data collection tools to the food service industry. The blog, "Food Waste Focus," discusses food waste trends and news items. One post tells of how Starbucks is reducing waste, and plans on saving \$400 million per year by not continuously brewing decaf coffee after 12 Noon. Another post forecasts a decline in salad bars, which are identified as a high volume source of produce waste. Check it out at: <http://blog.leanpath.com>.

The newsletter, "Food Waste Flyer," can be downloaded from LeanPath's website. The most recent edition includes source reduction discussions and conference and events announcements on food waste management in the service industry. For more information about LeanPath's tracking software, and its new blog and newsletter, visit: [www.leanpath.com](http://www.leanpath.com).
